# About our Garden Room Kits

We created two distinct specification options for our garden room kits, recognising that budgets vary as well as the end use of the garden room so there is a choice from either our **Premier** or our **Classic** Range.

Our Premier range of Garden Rooms and Kits offers the highest level of insulation, strength and finish; 100ml insulation in walls, roof and floor and 122mm thick SIPs.

We have shown our standard sizes in this brochure, however all Premier Garden Room Kits can be built to your size requirements (prices may vary).

**future sips**

A more budget friendly option in our Garden Room Kits is our Classic range which still offers a superior garden room for year round use. Roof and Walls are 97mm thick SIPs with 75mm insulation, roof from 122mm SIPs (100mm insulation) and finished internally in Standard MDF.

Classic rooms can also be built to different sizes - prices may vary.

## Cladding Options

Thermowood

British Cedar

Western Red Cedar

Composite

Our Complete Kits and Shell & External Kits offer a choice of external cladding from either Thermowood, British Cedar, Western Red Cedar or Composite. Prices are shown for each option on our models pages and assume all four walls of the building are clad in one type.

You can choose whether all sides of your room are clad in the same finish; where external walls are not visible you may prefer to opt for a less expensive cladding and we can provide a price change for this on request.
